V1.0 launch date:

V1.0 GA on 30th April 2018

Update Schedule & Model:

Free seamless product upgrades with no service interruptions for end customers. Current version of product in the market- Jile 4.0

The Product's Competitors: (List of Products/Publisher names)

Jile gives you the power of an enterprise Agile planning tool with portfolio-level reporting that enables you to scale Agile across your organization along with a DevOps tools integration hub for value stream visibility that aligns IT with business objectives-all in a single platform at the price point of an Agile team-level tracking tool.

Other products in the market are point solutions that only address one or more needs in the entire end-to-end value stream. These point tools require multi-integrations and licensing points, which creates complexity and increases costs.

Primary Unique Selling Points (USPs)

Jile is a single, scalable Agile DevOps platform that enables companies in any stage of their digital transformation to grow and continuously evolve by making it easier to plan, develop, and deliver high quality software, which accelerates value delivery and supports innovation, reduces time to market, increases efficiency, and aligns software delivery with business initiatives.

Secondary USPs:

- delivers continuous business value to the organization
- is a unique combination of an Enterprise Agile Planning tool and a DevOps tools integration hub in a single platform
- is available on the cloud at value pricing
- helps organizations make use of Agile practices at scale to achieve enterprise-class agile development
- is a flexible Agile DevOps platform that supports both project-centric and product-centric delivery

3rd-Party Validation:

Jile was featured in Gartner's Magic Quadrant 2019 for Enterprise Agile Planning Tools
